

SHOPPING FOR PUP

Congratulations on selecting your new Pegasus Stud Puppy. Your pup has been lovingly raised for their first 8 weeks in our home and we've done our very best to set pup up for an easy transition into your home.

Pups have been trained to use a fake grass puppy loo and are happily raised in a Puppy Pen. It is recommended to help your pup settle quickly and keep them safe that you purchase the following items for continuity in their training and growing into a valued member of your family.

Metal Puppy Pen. These can be purchased online or at places like Kmart or Bunnings for a very reasonable price. Get metal as pups can chew through plastic and timber.

Puppy Loo. Don't confuse your young pup and give yourself yucky surprises. They have been trained to go potty on the fake grass. Purchase one of the puppy loos. The regular small size will suit your pup for life. You can purchase this online, Ebay, Kmart etc.

We like the one with the pull out urine tray.
Easy for cleaning

NOTE Not just any fake grass will do. The mats have to be porous for the urine to pass through and they have a white underside. Ebay sell loos with additional grass mats which is handy for cleaning, you can hose one off and leave to dry but still have the spare one on the loo.

SHOPPING FOR PUP

Food & Goats Milk

Pup is raised on **Meals for Mutts** Puppy food and will come with some when collected. But best to purchase the same to keep pup on the same diet whilst they settle in. I recommend Budget Pet to purchase online or 'Best Friend' pet stores and other quality pet and produce stores.

Also get some **Caprilac Powered Goats Milk** to make up for pup to drink and eventually water it down so pup is drinking your water. You can also add it to their soaked kibble. It's what pup was weaned on to start and is full of calcium for those growing bones, and it doesn't have lactose. Chemist Warehouse stock this brand and the powdered milk is more cost effective and keeps longer than ready made.

Transport - BUY A CRATE PLEASE

A soft or hard plastic puppy carrier is ideal for car rides to keep pup safe and legal when traveling. Soft crates can fold down for storage or can also double as a bed. Pups like little caves, it make them feel safe.

Please don't drive home with puppy in a harness or similar as its scary for them and they will be small and finding the right fit will be difficult. The trip home with you will usually only be their second time in a car. We have taken the time to get them comfortable in a crate so they don't stress during transport. Kmart sell good quality hard plastic or soft fold down crates at very reasonable prices.

Please buy one before collecting pup from us.

Cleaning and disinfecting your home

F10 is a veterinary grade disinfectant that even kills Parvo germs. Plus it eliminate odours by killing the germs that create them. It's great for spraying on those grass Loo mats between wash downs. It's highly concentrated so you only need 4 mils to make up a 450 mill spray bottle. Or 5 mils in a bucket for mopping floors.
